## **Training on Preparation of City Sanitation Plan – Part 2**

### **State of Uttarakhand**

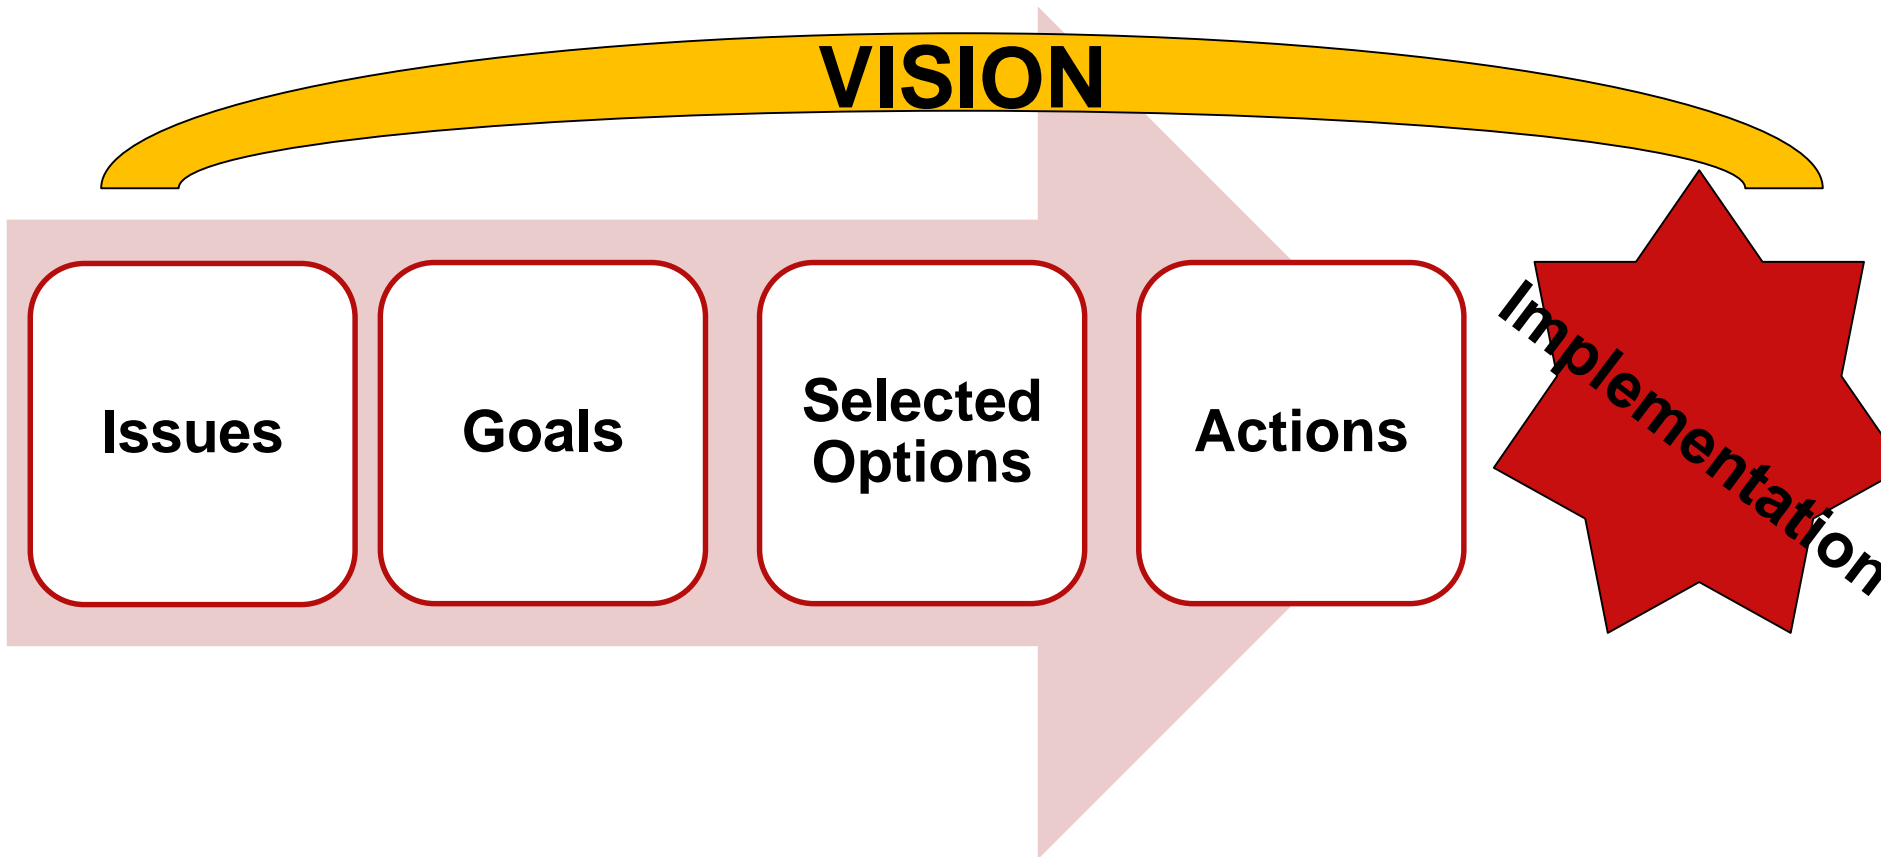

## **Session 5:**

# **Summary of City-wide key issues**

Dehradun, 20-22 April 2017

# Key Issues are the starting point

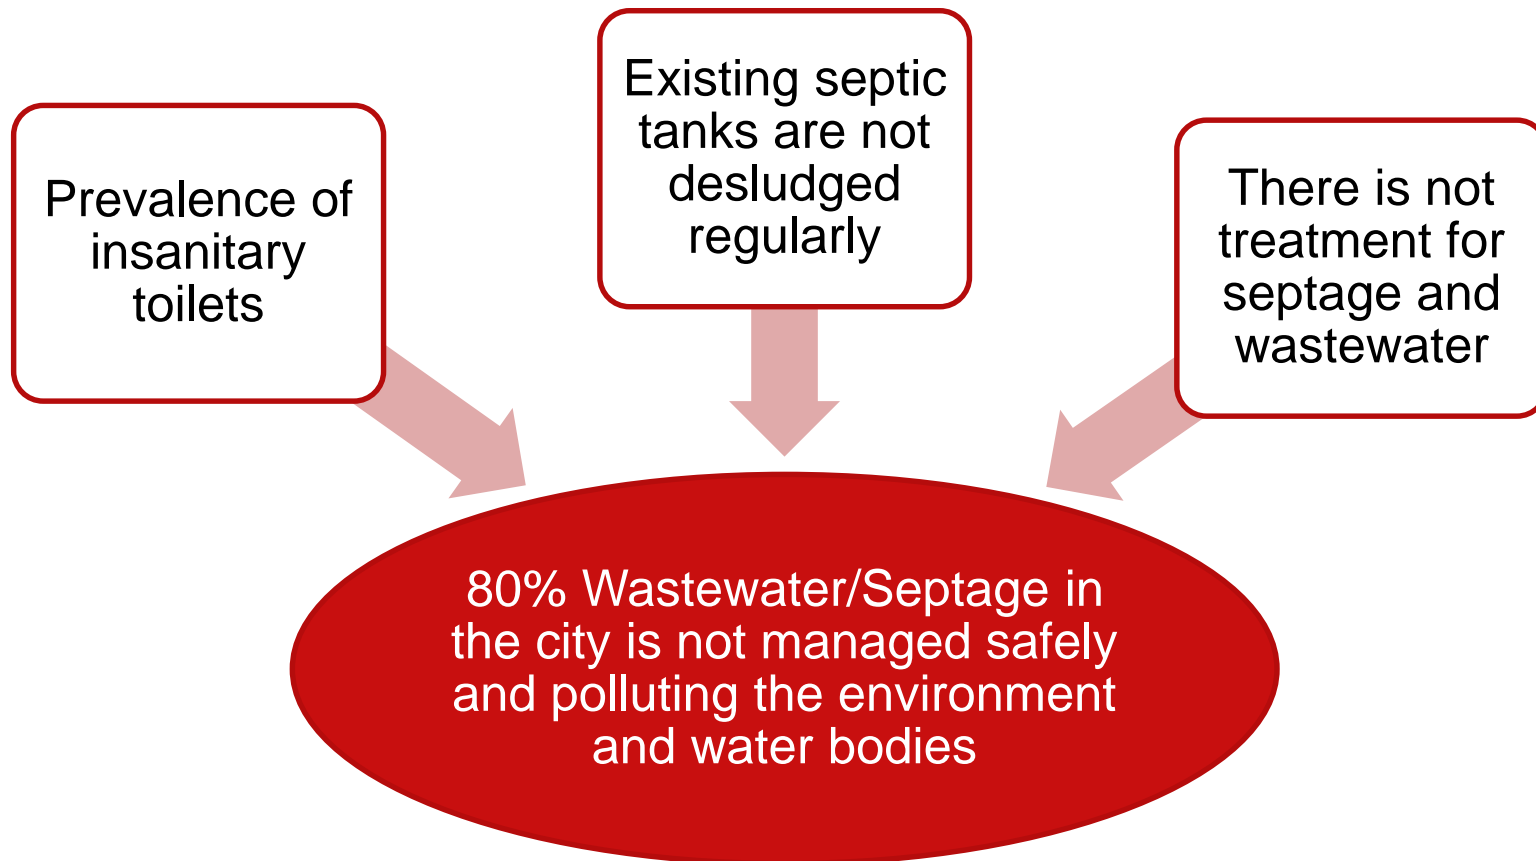

## Selected key issues in existing CSPs

Sewerage/ Septage	Water supply	SWM	Toilets	Drainage	Finances
Only 11% of the total sewage generated is treated in spite of installed treatment capacity	Non revenue water levels are high and needs urgent attention.	Indiscriminate dumping of solid waste in open storm water drains and inadequate treatment and disposal facility	Prevalence of open defecation in certain low-income pockets.	Storm water drain network faces severe abuse with 'grey water flows' and solid waste dumping.	Cost recovery levels in sewerage and solid waste are very low vis-à-vis prevailing O&M costs.

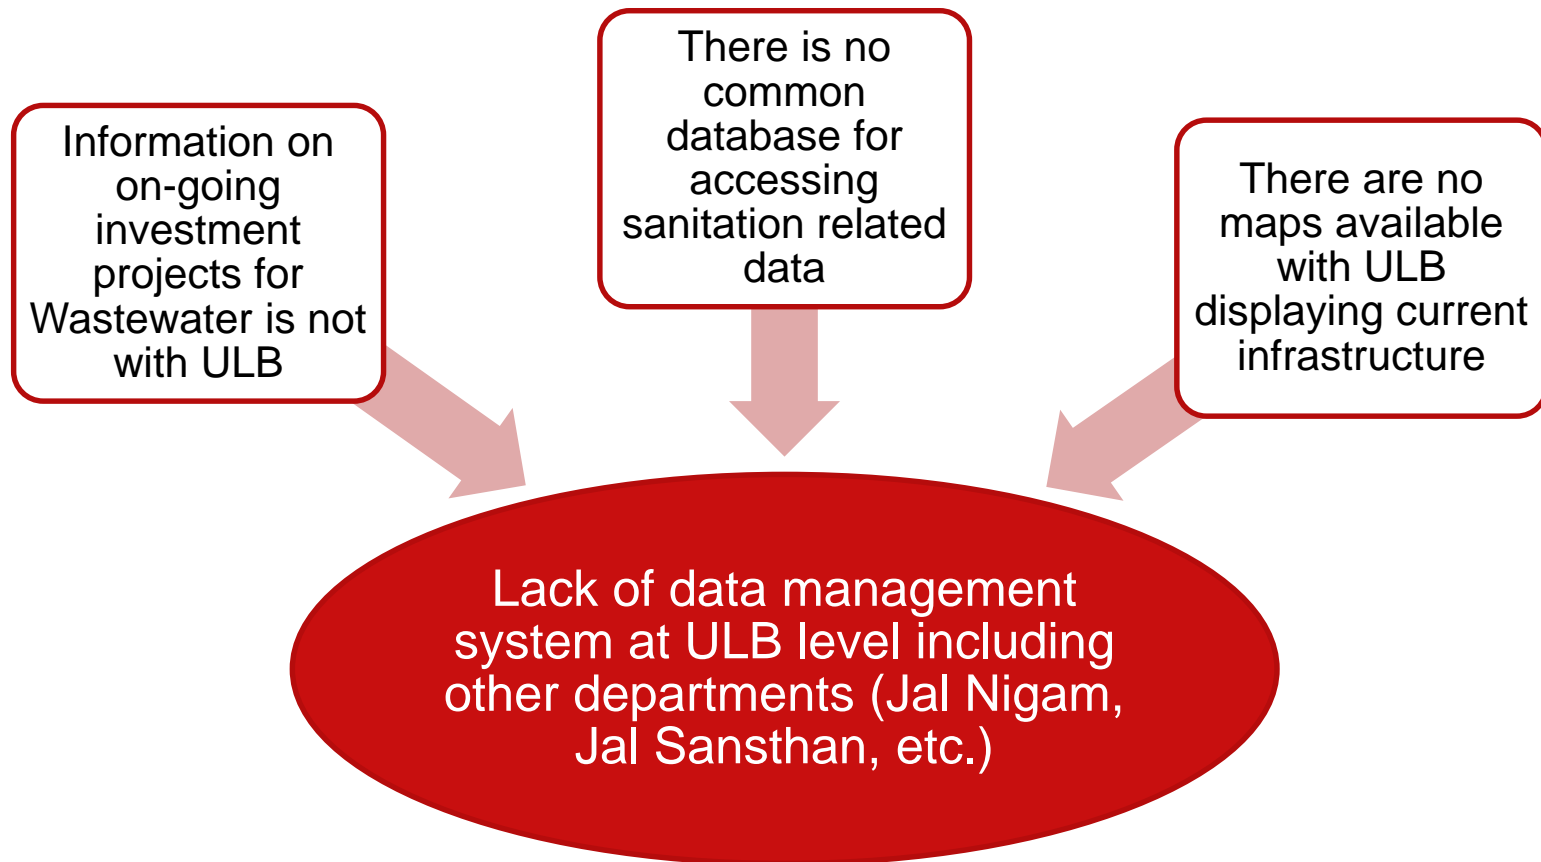

# From sector-wise issues to city-wide key issues

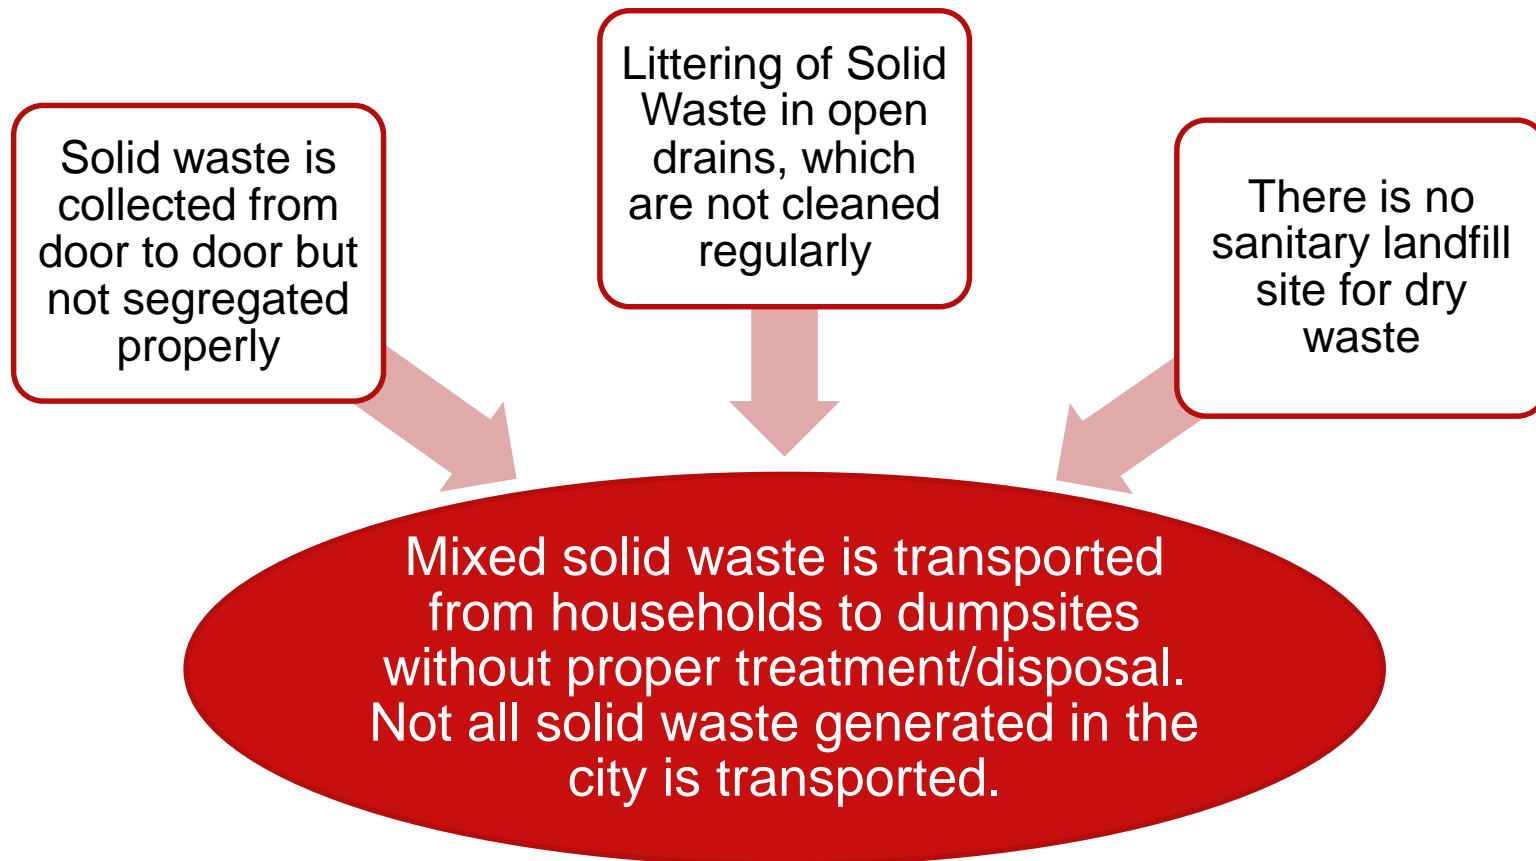

# From sector-wise issues to city-wide key issues

# From sector-wise issues to city-wide key issues

# Align your key issues with goals of SBM and other state/national programmes

## SBM

- 100% elimination of open defecation
- 100% door to door collection
- 100% transportation of waste
- 100% processing and safe disposal

## Namami Gange

- No pollution of river Ganga and her tributaries from domestic and industrial sources

## Steps towards City-wide Sanitation issues

1. List all issues identified under each technical sector and support pillars (Governance, Finance, Inclusion)
2. Cross-check the interlinkages between the different sectors and structure key issues
3. Club all sectoral issues together in 8-10 key issues
4. Formulate a rationale for each key issue based on status report.
5. Check the final list of key issues for relevance for the whole city.

As a federal enterprise, GIZ supports the German Government in achieving its objectives in the field of international cooperation for sustainable development.
